# Prototyping Experiences

**The Garage** is a space of creation and prototyping to know, in a realistic and pragmatic way, how we can solve business challenges through **Blockchain technology**.

The objective is the development of actionable prototypes and oriented to the needs of the different business areas of **our clients**.

We want ideas not to remain in a paper and jump to reality. We want to shape the use cases and to materialize them.

# Awareness

From [The Garage](#) will support all the actions of awareness, related to the technology of Blockchain, both internally and externally with the aim of positioning our client as a company at the forefront in this technology, as well as allowing it identify external talent in this ecosystem.

an NTT DATA Company

# Training

[The Garage](#) is an enabler for internal training and begin to speak decentralized language.

With the program [Become a blockchainer](#) we help to understand Blockchain technology in a simple way with a practical approach, so our clients understand how to apply it in strategic areas and processes and to detect and take advantage of new opportunities.

# imagine The Garage: aspirational model

## Scalable model

- Blockchain functional specialist
- Prototype front-back-app programmer
- Blockchain programmers
- Security expert (criptography)
- External support
- Functional and technical vision
- Expert technical team
- External legal support

- Servers on different platforms: Azure, IBM, AWS, everis, lab...
- Bitcoin hardware: wallets, Bitcoin computer, Raspberry Pi
- Minimun budget for events: Meetups, hackathons...

# The Garage blockchain

## Team

- Multidisciplinary team
- Functional and technical team
- External support
- Scalable
- Support for awareness
- Training capabilities

## Infrastructure:

- Integration
- Performance
- Quick start

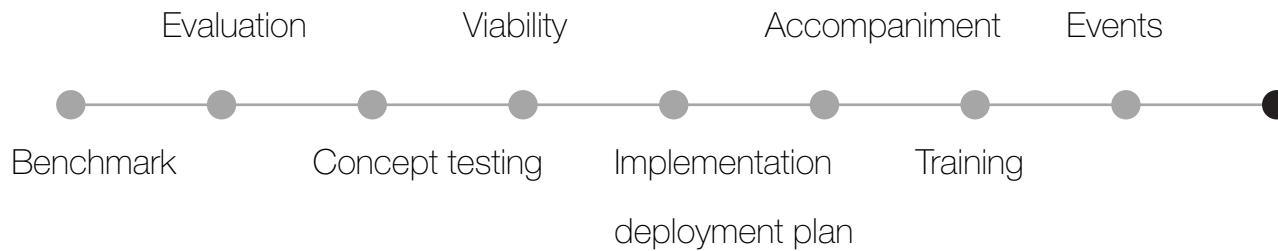

## Methodology

- Agile
- Innovation oriented
- Flexible
- Definition of use cases

## Assets:

- Components
- Performance
- Quick start
